PROFILE

Founding engineer building enterprise AI agents, evaluation systems, and safety controls. Lead customer projects from requirements through launch, connecting technical architecture with product delivery.

EXPERIENCE

Rapidflare, Inc. Oct 2025 - Present

Founding Engineer | San Francisco, CA

- Built the AI Safety Filter to classify incoming messages before retrieval, detect multi-turn jailbreaks, and apply customer-configurable policies.
- Designed customer-specific evaluation pipelines to compare Rapidflare agents with alternatives and trace answer quality to source evidence.
- Automated pre-sales onboarding with AI agents, cutting a week of manual work to within three hours and increasing the sales-call acceptance rate more than 10x versus the prior process.
- Lead the AMD ROCm Developer Assistant across Discord and Discourse, delivering source-backed answers for developer communities.
- Own requirements and delivery across five customer projects, from discovery through implementation and iteration.
- Built inline citations so technical answers point to supporting documentation users can verify.

ARC Lab, Arizona State University Dec 2024 - Present

Research Assistant | Tempe, AZ

- Research multilingual language models under Prof. Ben Zhou, using data mining, model training, and evaluation on HPC clusters.

Arizona State University May 2024 - Dec 2024

Research Aide, Software Engineering | Tempe, AZ

- Built an OCR workflow with Next.js, Flask, AWS Textract, and YOLOv8 that reduced truck gate processing from five minutes to 5-10 seconds.

NGL Transportation Inc. Jan 2022 - Jan 2023

Software Engineering Intern | Phoenix, AZ

- Built ML-backed yard management automation for real-time tracking of more than 1,000 daily transactions using SQL and AWS S3.

SELECTED PROJECTS

- Rebil: Built a vehicle rental marketplace for Indonesia, owning full-stack development and GCP infrastructure.
- Atoms: Developed MCP server and AI agent workflows to automate business processes with Next.js and n8n.
- Llama Socrates: Built a fine-tuning pipeline that improved math accuracy 32% and reduced perplexity 25%.

TECHNICAL SKILLS

AI: Agent architecture, evaluation, safety, RAG, model training, RL, computer vision, CAPTCHA
Engineering: Python, TypeScript, Next.js, React, Flask, Elasticsearch, Redis, GCP, AWS, Supabase, Docker, Git, LangSmith

EDUCATION

Arizona State University

B.S. Computer Science, Dec 2025 | GPA: 3.76/4.0

Dean's List (2023-2025) | NamU Scholarship (2023-2025)

SELECTED WRITING

[AI Safety Filter](#) | [Enterprise Agent Evaluation](#) | [Inline Citations](#)
